

FTE

Full Transcritical Efficiency

KYSOR WARREN
eptarefrigeration

Introducing the newest innovative technology from Kysor Warren Epta US. FTE can be added to any CO2 Transcritical system to improve efficiency and reliability in all climates.

Eco-friendly R-744
Natural Refrigerant

Natural refrigerants, like CO2, offer environmentally sound solutions for your refrigeration & sustainability goals

FTE uses an innovative technology that increases efficiency by overfeeding the evaporators, without risking compressor flood-back. The result – a more efficient and reliable system that can eliminate the need to anabatic gas coolers in warmer climates and improved efficiency in all climates
